

CURE Pharmaceutical & Therapix Biosciences Signs MOU with Israel's Assuta Medical Center to Develop First-in-Class Therapeutic Products in Fields of Personalized Medicine & Cannabinoids

OXNARD, California and TEL AVIV, Israel, July 11, 2017 [/PRNewswire/](#) -- CURE Pharmaceutical (OTCQB: CURR), ("CURE"), a leading disruptive drug delivery technology and pharmaceutical cannabinoid molecule development company and Therapix Biosciences (NASDAQ: Ltd. (Nasdaq: TRPX), ("Therapix"), a specialty clinical-stage pharmaceutical company dedicated to the development of cannabinoid-based drugs headquartered in Israel, announced today that they signed a memorandum of understanding (MOU) to enter into a research collaboration with Israel's largest and leading private medical services center, Assuta Medical Centers, Ltd., ("Assuta"). The Companies will collaborate to advance, research, develop and commercialize potential therapeutic products in the fields of personalized medicine and cannabinoids.

"As CURE focuses on targeting unmet needs in traditional pharmaceutical markets that could be disrupted by cannabinoid-based options, we are continuously looking to help bring new therapeutic cannabinoid-based products to market and further efforts toward the creation of personalized medicine," said Robert Davidson, CEO of CURE Pharmaceutical. "Our new collaboration with Therapix and Assuta, two leading companies in Israel, a Country that is at the forefront of cannabinoid-based research in the world, is the perfect place to start the development of these products."

Dr. Ascher Shmulewitz, Chairman of Therapix, added, "CURE is the ideal partner for us to enter this promising and cutting-edge personalized cannabinoid-based therapeutics; this deal has all the signs of a fruitful venture."

As agreed to in the MOU, the Companies intend to formalize the pooling of professional, scientific, financial resources and expertise, in order to benefit from each of its respective advantages and capabilities to develop new therapeutic products in the fields of personalized medicine and cannabinoids. Specifically, CURE and Therapix will provide support and expertise in the development of pharmaceutical products, while Assuta will support the early research and development of potential projects through its research and facilities.

"Assuta is happy to enter into the MOU with CURE and Therapix, and I am confident that the parties' cooperation will be a successful one, with many other projects to follow," said Professor Ari Shamiss, CEO of Assuta. "This new collaboration is yet another step Assuta is taking in the innovation world, and one of many steps to be taken by Assuta in the field of biopharma."

About CURE Pharmaceutical

Headquartered in Oxnard, California, CURE Pharmaceutical (OTC:CURE) is a fully integrated specialty pharmaceutical/bioscience company that leverages disruptive proprietary drug delivery technologies for a broad range of molecules serving the biopharmaceutical, veterinarian, medical foods and pharmaceutical cannabis markets. CURE develops its patented and proprietary delivery system (CureFilm™), the most advanced oral thin film on the market today, from its industry leading full service cGMP manufacturing facility. The Company's mission is to deliver proven drugs in a fast and efficient manner and to improve quality of life.
